

Dear Josh,

Thank you for the  
Notice about the Australian job,  
Michael White told me that he  
also thought of me & wrote to  
them - however I am rather loathe  
to leave this land of Rogers for another,  
distant and unknown land of Rogers!

Thank you also for the  
reprints but please change my  
address to the ~~about~~ above as it is  
only by luck that O.B.L. forwarded  
this lot of yours.

My actual plans are to

(2)

get some money to work with  
Windegren, or rather with Carl's  
yeast data for I will not be in  
Corbanae physically more than briefly.

I would like to do this as the  
data is very voluminous and challenging  
in the sense that it does not make  
much sense at first sight. I hope the  
money comes through.

I went to one or two recombination  
talks at Cold Spring Harbor but on the whole I  
found the one at Oak Ridge two or three years ago  
more interesting. I missed May Case's paper  
which most people told me was excellent.  
I also missed Brink but I believe I know the  
story he told. ~~On the~~ I thank heaven for Chin  
Bridges, without his ~~the~~ multi-character crosses  
I think we would have serious doubts  
about the linear order of genes!.

Did you hear that Senator  
Kennedy is asking for equal time in Venezuela?
